## EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the "SKIRTING 40" also choose with or without adhesive.
2. Cut the profile to the required length, taking care to calculate the width of the inside-outside corner joints.
3. For the self-adhesive version, the surface must be smooth, grease-free and not porous. It is not recommended for plaster and mortar surfaces (version without adhesive is better, using fast-setting acrylic silicone which is suitable for fixing aluminium to mortar - plaster, etc.).
4. Use the corner linking elements-joints and right and left end caps to facilitate laying.
