

SKIRTING 100 SKIRTING 150

POLISHED AND BRUSHED
STAINLESS STEEL AISI 304/1.4301-V2A

SKIRTING 100 and **SKIRTING 150** made in stainless steel AISI 304/1.4301-V2A in height 100 and 150 mm. Available with or without adhesive. Superior aesthetic quality, extremely strong and easy to lay, it is ideal for all public and private environments that require high standards of hygiene and image. Used increasingly more often in contrast combinations with wood, carpeted floors, etc. for an unmistakable hi-tech effect. In order to facilitate and to perfect the laying process, internal and external angles, plugs and junctions are recommended.

EXAMPLES OF LAYING

SUITABLE FOR USE IN CONTACT WITH FOODSTUFFS

LAYING INSTRUCTIONS

1. Choose the "SKIRTING 100 -150" also choose with or without adhesive. 2. Cut the profile to the required length, taking care to calculate the width of the inside-outside corner joints. 3. For the self-adhesive version, the surface must be smooth, grease-free and not porous. It is not recommended for plaster and mortar surfaces (version without adhesive is better, using fast-setting acrylic silicone which is suitable for fixing aluminium to mortar - plaster, etc.). 4. Use the corner linking elements-joints and right and left end caps to facilitate laying.

USE PROBAND FIX FOR FIXING THE PROFILE TO THE WALL
