

Progress Profiles

Progress Profiles is leader company that produces more than 12.500 different profiles and items, waterproofing and

decoupling membranes for any type of floor and wall covering needs. At the recent Munich's BAU Fair, the latest solutions presented were the Prodeso Heat & Heat Grip, a system that gives you the comfort and convenience of an underfloor electrical radiant heating in few minutes, the Prodeso, an uncoupling, and waterproofing membrane for interiors and exterior balconies, terraces and horizontal surfaces of any dimensions, and the Proleveling, a revolutionary leveling system when laying medium and large materials. For wood-floors, SKIRTING 7016 and SKIRTING 7011 are two vinyl resin foam profiles available in 30 different wood-effect finishes.
