

Progress Profiles

Progress Profiles supplies profile solutions for all situations for the most demanding clients and ranging from decorative strips to solutions for all technical problems. For limited thicknesses Progress Profiles has an extensive range. Differences in height from 4 to 19mm are possible. Aesthetic goals are still kept at the forefront [aluminium, bronze, steel, real wood, and such like]. Moreover, there is an extended range of colours and finishes, including 30 wood shades. All profiles are tested in accordance with the highest standards. Non-toxic and high-quality raw materials are part of the secret. The profiles most in demand are 'threshold profiles' between different floor types. Whilst they recognise that multifunctional profiles are certainly practicable, they pay more attention here to elegance and design. Progress Profiles offers no fewer than 12,500 references.

Special Producers of profiles specifically for LV, PVC, and vinyl floors

Aftercare It is a well-known fact: Aftercare. The most important step after installation is to protect the floor. This is done by applying a protective film. This film is made of a high-quality material and is easy to apply. It protects the floor from scratches and stains. For more information, visit our website: [www.progress-profiles.com](#)

Module The progress profiles are available in different modules. This allows for a flexible installation in different situations. The modules are made of high-quality materials and are easy to install. For more information, visit our website: [www.progress-profiles.com](#)
