SKIRTING BOARDS AS 'THE FINAL TOUCH' OR 'THE CROWN ON TOP'

A FLOOR JUST ISN'T COMPLETE WITHOUT SKIRTING BOARDS

Progress Profiles

Metal colours are forming the trend for skirting boards with silver in the lead. The new Proskirting Channel and the Proskirting Flat are available in white lacquered aluminium. The dimensions of the

skirting boards are purely a matter of taste. Heights of 40-60mm are for the more modern frame, whilst 80-100mm is for the classic interior. The new Proskirting Giled is an anodised aluminium skirting board with integrated LED lighting which diffuses a gentle indirect light and provides a contemporary atmosphere. Here, too, digital print is a major technological step ahead, not least through the growing demand for vinyl skirting boards. Their latest investment was in a machine which can reproduce an endless number of wood decors and allows for completely personalised finishes. The latest novelties include Cove Cap (flexible non-toxic vinyl profiles), Proskirting 40 (anodised silver alu of 40mm), Proskirting Chanel, and Proskirting Flat.

Special Producers of skirting boards

Progress Profiles - PVC skirting for the domestic and business client. They have developed a wide range of skirting boards in different finishes, colours and textures. The range is suitable for every type of interior, from the classic to the modern, from the traditional to the contemporary. The skirting boards are available in different heights and widths, and can be customised to suit the client's requirements. The skirting boards are made of high quality PVC and are easy to install. They are available in a wide range of finishes, including wood, stone, and metal. The skirting boards are also available in different colours and textures, and can be customised to suit the client's requirements.
