

PROFILES ARE THERE TO BE SEEN (SOMETIMES)

PERSONALISATION IS ENTERING YET ANOTHER REALM

Progress Profiles

Progress Profiles creates innovations every year on the basis of architectural trends. Aluminium, stainless steel, and other metals are doing well here. Colour, too, is

important. That's why Progress Profiles offers an extensive range of finishes. In their view, multifunctional profiles are useful, but they lose out somewhat in design, as people attach great importance to functionality in combination with elegance. Glue and clips are the favourites for fastening. Durability is seen as essential. The Progress Profiles range is very extensive. Next year, they are unveiling a new line, namely the Pro-shower Profile. This line comprises the profiles Pro-shower Profile Glass, Pro-shower Profile Front, Pro-shower Profile Wall, and Pro-shower Profile Panel. All are components of the Pro-shower System, an innovative solution for bathrooms.

STAIR FURNISHING CAN ALSO BE 'FLEXIBLE'

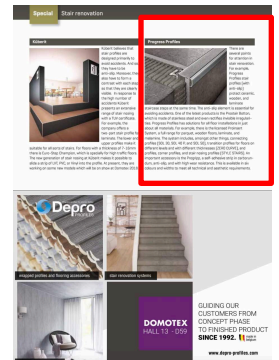

THE STAIR CARPET IS BACK, BUT IN FULL WIDTHS

Progress Profiles

There are several points for attention in stair renovation. For example, Progress Profiles stair profiles (with anti-slip) protect ceramic, wooden, and laminate

staircase steps at the same time. The anti-slip element is essential for avoiding accidents. One of the latest products is the Prostairs Botton, which is made of stainless steel and even rectifies invisible irregularities. Progress Profiles has solutions for all floor installations in just about all materials. For example, there is the licensed Proinsert System, a full range for parquet, wooden floors, laminate, and melamine. The system includes, amongst other things, connecting profiles (SOL 30, SOL 40 P, and SOL 50), transition profiles for floors on different levels and with different thicknesses (ZERO CURVE), end profiles, corner profiles, and stair nosing profiles (STYLE STAIRS). An important accessory is the Proripp, a self-adhesive strip in carborundum, anti-slip, and with high wear resistance. This is available in six colours and widths to meet all technical and aesthetic requirements.

INLAY GIVES A 'TOTAL MATCH'

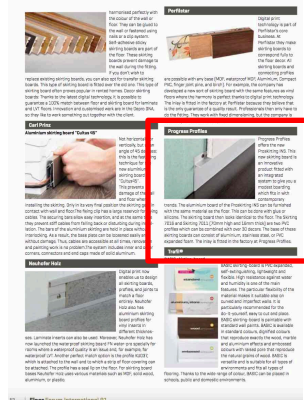

SKIRTING BOARDS STILL PLAY A MAIN PART IN THE END FINISH

Progress Profiles

Progress Profiles offers the new Proskirting INS. This new skirting board is an innovative product fitted with an integrated system to give you a modest boarding which fits in with contemporary

trends. The aluminium board of the Proskirting INS can be furnished with the same material as the floor. This can be done with glue or silicone. The skirting board then looks identical to the floor. The Skirting 7016 and Skirting 7011 (70mm high and 16mm thick) are two PVC profiles which can be combined with over 30 decors. The base of these skirting boards can consist of aluminium, stainless steel, or PVC expanded foam. The inlay is fitted in the factory at Progress Profiles.

ECONOMIC MIRACLE HAS MADE ITALY WEALTHY

YET TODAY ECONOMIC GROWTH IS STEADILY WANING

PROGRESS PROFILES

Lino Bordin, founder of Progress Profiles, crossed the Atlantic Ocean after World War II in search of a better life. However, in the early 1980s, he returned to Italy after building up a strong company in Canada in the extrusion of plastic and metal profiles. His son Dennis, who has managed the company since the 1990s, went down the road of technological innovation, encouraged by his brother-in-law Fania Pontin, who entered the company in the same period. In 2015, the company opened new headquarters in Asolo. They also have divisions in New Jersey, Dubai, and Australia. Progress Profiles makes scores of accessories for the interior, including skirting boards and profiles. The company supplies lots of licensed systems for all types of floors from the installation to the finish. Additional products include LED lights, terrace insulation, protection for balconies, floor heating, etc. The company continues to invest in the latest technology. Progress Profiles makes over 13,000 products in stainless steel, aluminium, bronze, PVC, and real wood. They employ 130 staff and have network of 120 dealers. Their annual capacity is about 12 million square metres. Progress Profiles exports products to over 50 countries worldwide, and exports account for 36% of their turnover. As regards new products, we mention the Pro-shower System and the Pro-shower Panel with innovative solutions for combining functionality and design. Other innovations are Prodeso, Pro-foil Panel, the Go-Board Panel, and Pro-terrace Drain Drip. +39 (0) 423 950 398 - www.progressprofiles.com

Special Top Italian companies focused on export
