PROGRESS PROFILES

Progress Profiles is a world leader in the production of technical and decorative finishing profiles and laying systems, including membranes, for the building and interior design sectors. With 39 years of experience, three headquarters in the USA, the Middle East and Spain, and a new one soon to open in Abu Dhabi, the Italian company has developed a wide range of products and systems that are exported to over 80 countries worldwide. Committed to innovation, Progress Profiles embraces advanced technologies to create high-performance products that meet stringent quality standards.

◀ Coverskirting Round and

Coverskirting Square

Coverskirting Round and Coverskirting Square are the ideal solution for those who want to renovate interiors without the hassle and expense of demolition: easy and quick to install, they allow efficient and cost-effective restyling. Coverskirting Round and Coverskirting Square are available in white, black, silver and various wood finishes. Thanks to their special section, they can be used to cover ceramic skirting boards with a maximum height of 75 mm. These profiles, 80 mm high and 20 mm thick, have good chemical resistance and can be fixed with Proband Fix.
